Experience

Social volunteering

[ONG Footprints](#)

07/2019 - 04/2022

- Volunteering embodies selfless commitment to causes like aiding the elderly, supporting soup kitchens, working with children, offering a unique chance to make a positive impact in the community and experience deep personal fulfillment.

Software Engineering

[Quality Soft](#)

03/2023 - 12/2023

- Migrated a partial part of the company's accounting software using MERN stack.
- Utilized MERN stack techs to execute the migration process. Conducted analysis, development, and testing to ensure a smooth transition.
- Streamlined the accounting software, enhancing its efficiency and functionality. Improved user experience and facilitated easier access to critical data, contributing to increased productivity within the company.

FullStack Development

[ATAM](#)

07/2023 - 01/2024

- Developed a Commercial WebApp for self-management of budgets tailored for affiliated automotive workshops within the association with technologies like **JavaScript, React, MongoDB, Node, Express, MUI, and TailwindCSS** for the user interface.
- Designed a user-friendly interface prioritizing accessibility for automotive workshop owners.
- Implemented features for tracking expenses, income, and financial projections within the application.
- Employed no relational databases with **MongoDB Atlas, GraphQL** to securely store and manage financial data.
- Conducted thorough testing and iterative improvements based on user feedback and association member input.
- Significantly optimized the way workshops handle finances, providing an efficient and user-friendly tool.
- Facilitated financial decision-making by offering a clear and organized view of budgets and projections.
- Enhanced operational efficiency for workshops, resulting in increased profitability and stronger financial management for association affiliates.

Web Development

[Nora Feng-Shui](#)

Sevilla, SPA 09/2023 - 01/2024

- Created a Feng Shui-inspired website with tailored design, embodying its principles, and featuring custom interactive tools with **JavaScript, React, MUI, Framer Motion, and TailwindCSS**.
- Applied Feng Shui design techniques for layout and aesthetics and collaborated with experts to ensure content accuracy.
- Attracted an audience interested in Feng Shui principles. Provided accessible information and practical tools for users.
- Enhanced the client's online presence and engagement.

Education

University technique

[UTN - MDP](#)

Mar del Plata, BSAS, ARG 01/2022 - Present

- University technician in programming

Online Course

[Devtales](#)

Toronto, ON, CAN 02/2022 - 11/2023

- FullStack Development with MERN

Summer Coding Camp

[Go Elevate](#)

Buenos Aires, ARG 03/2021 - 12/2021

- FullStack developer course by Eng. Gustavo Andres Brey.
